

## Capability Statement

---

**Homer City Automation, Inc. (HCA)** is the exclusive manufacturer of **Syntron®** parts handling and automation products for use in assembly operations and production lines. HCA offers standard products (electromagnetic drive units, bowls, rotary feeders, supply hoppers, linear drives, etc.) and custom tooled feeders and systems for specialized parts handling requirements. HCA offers both vibratory and rotary orienting bowl feeders which are custom tooled, as well as bulk supply hoppers, elevators, conveyors, linear feeders, and tracks. This small business is a spin off of the former FMC Technologies Parts Handling product line and has been operating under the HCA name for two years. In addition to our complete **Syntron®** product line, HCA also has full **job shop** capabilities. We can design & fabricate both production quantities and custom one-of-a-kind sheet metal parts and assemblies for our valued customers.

**HCA Has Served Clients** from a diverse range of industries including pharmaceuticals, plastics, packaging/counting, ammunition, electronics, cosmetics, hardware, and food.

### Benefits of working with HCA:

- 300+ years of expertise in the Parts Handling industry
- Syntron® Product quality and reliability
- Demonstrated ability to feed, singulate and orient difficult parts
- Proven ability to reduce customer production costs & increase productivity
- Full job shop capabilities thru established partnerships
- Responsive & customer-focused service with integrity & courtesy

### HCA Facilities:

#### Sheet Metal Fabrication:

Shear, break & roll  
Cutting & Sawing  
Drilling & Reaming  
Punching

#### Fabrication:

12 ft Cincinnati Shear & Break  
2000 Watt Cincinnati Laser  
5 Ton overhead crane  
40,000 sq ft shop space

#### Welding:

Miller Millermatic© 350P MIG welder  
Miller Millermatic© 350LX TIG welder  
Oxyacetylene torch/welder

#### Coatings/Linings Processes:

Irathane, Urethane, PVC & Teflon  
Passivation & Hardening  
Wet painting & Powder Coating
